

Product Description

Tel-Conn Manufacturing builds custom multimode 50um OM2 fiber patchcords to meet your specifications. Our production and management teams work closely together to ensure quick delivery of a quality custom product. Using state of the art assembly equipment, our skilled technicians optically inspect and test every cable to meet or exceed industry standards. OM2 multimode cables are typically orange in color. You can choose from a large stock inventory of our most popular connector combinations and lengths, or build your own custom jumper with a virtually endless combination of the components listed below (and in your custom length of meters or feet).

Cable Type:

- Simplex
- Duplex

Jacket Type:

- Riser
- Plenum
